Safer Streets

Reduce Violent Crime by 20% by June 30, 2016.

Chattanooga's streets are too dangerous and City Administration is relentlessly focused on reducing violence in our community. Through innovative strategies like the Chattanooga Violence Reduction Initiative (VRI) and implementation of community-based policing models, we are working every day to make our streets safer for all Chattanoogans. This chart measures average monthly incidents since June 2013 with a target to reduce violent crimes by 20% from the three month average of 142 incidents for the period June 2013 and August 2013. Epicethelias

128.4 average monthly incidents

113.6 average monthly incident Jun 2016 Target

Community Engagement

To ensure every Chattanoogan feels safe in his or her neighborhood, the Chattanooga Police Department has expanded its collaboration with community members and put in place the key principles of Community Policing.

Portal

This portal contains data collected from the City of Chattanooga as well as the community. The Chattanooga Public Library hosts the Chattanooga Open Data Portal. In these efforts, the library is in partnership with both the City of Chattanooga and Open Chattanooga. The goal of the Chattanooga Open Data Portal is to be the primary location for all open data to be utilized by its citizens.

YOUR GIG IS HERE.

Right here, in Chattanooga.

Only in Chattanooga, Tennessee is 1 <u>Gig</u>abit-per-second Internet speed available to every home and business - over 150,000 of them - throughout the entire community. Urban or rural, business or residence, Internet speeds that are unsurpassed in the Western Hemisphere – from 50 Megabits-per-second all the way up to one gigabit-per-second are accessible here. Today.

In February 2013, CBS News' Jeff Glor paid a visit to Chattanooga to learn first-hand about the fiber optic network and what it's bringing to the community. From incredible Internet speeds to improvements in electric power delivery, CBS News reports the story here.

Chattanooga? As in, the Choo-Choo?

Why did we do it? In Chattanooga, we have a legacy of taking bold steps that benefit our community. When Volkswagen announced Chattanooga as its headquarters for North American manufacturing, and Amazon.com chose our city for their new distribution centers, it was a nice confirmation that we're on the right track.

But we're just getting started.

Because everything we create - from infrastructure to opportunity - we build of, by and for our community.

And we are looking for people to join us. We're open for business.

100% Fiber turns Possibilities into Potential.

Chattanooga's community-owned electric utility EPB is installing a 100% fiber to the premises network. Built to run America's first true Smart Grid and offer residential high speed Internet, video and telephone services, the network was also built to empower our community in new ways.

Because bandwidth is no problem, Chattanooga's Fiber Optic network enables upload and download speeds 200 times faster than the current national average, and 10 times faster

than the FCC's National Broadband Plan (a decade ahead of schedule).

Make a Smart Move to EPB Fib Optics.
